This Furniture thrives on contrasts and dynamic balances. the top: white, thin and opaque contrasts with the brightness of Silver decor on the drawer 16 cm high.

The entire cabinet is constructed of solid surface included the built-in wash-basin and towel holder.

The push-pull drawer is used as storage space and may become housing of nechanical fittings if mixer placed sideway.

the rectangular suspended drawer 200 cm installed below the furniture complete the set with elegance and practicality

Material:

Solid Surface is the combination of a natural material (ATH) and an acrylic resin of highest quality that absolutely does not include any polyester resin (PMMA 100% acrylic polymer).

The acrylic resin offer the property of remaining unchanged over time keeping its original color and never yellowing.

Thanks to its being a compact, not lined or laminated material the Solid Surface allows highly efficient installations. Its compact, hygienic, fireproof and non-porous surface is long-lasting and easy to clean using ordinary home cleaning products.

Its composition and color are homogeneous all through its cross-sections: this makes it possible to easily remove small scratches and cigarette burns and restore the original beauty of the surface.
